

Riser card PCI

1U5Rx2

www.inpc.com.ua

PCI slot1 use motherboard PCI slot's Device ID and INT.
PCI slot2 use INT _A. Switch position for pins DEV_ID and JP1-JP12 (on a picture) determine Device ID of expansion card for PCI slot2.
The picture shows switch position in riser card for VIA EPIA, JETWAY, INTEL D201GLY2, INTEL D945GCLF2D motherboards.
For other motherboards you determine switch position empirically.
