

# Riser card PCI

# 1URx2

[www.inpc.com.ua](http://www.inpc.com.ua)

PCI slot1 use motherboard PCI slot's Device ID and INT.  
PCI slot2 use INT \_A. Switch position for pins DEV\_ID and JP1-JP12 (on a picture) determine Device ID of expansion card for PCI slot2.  
The picture shows switch position in riser card for VIA EPIA and JETWAY motherboards.  
For other motherboards you determine switch position empirically.
